

Care Control

- Care Control

Care Control

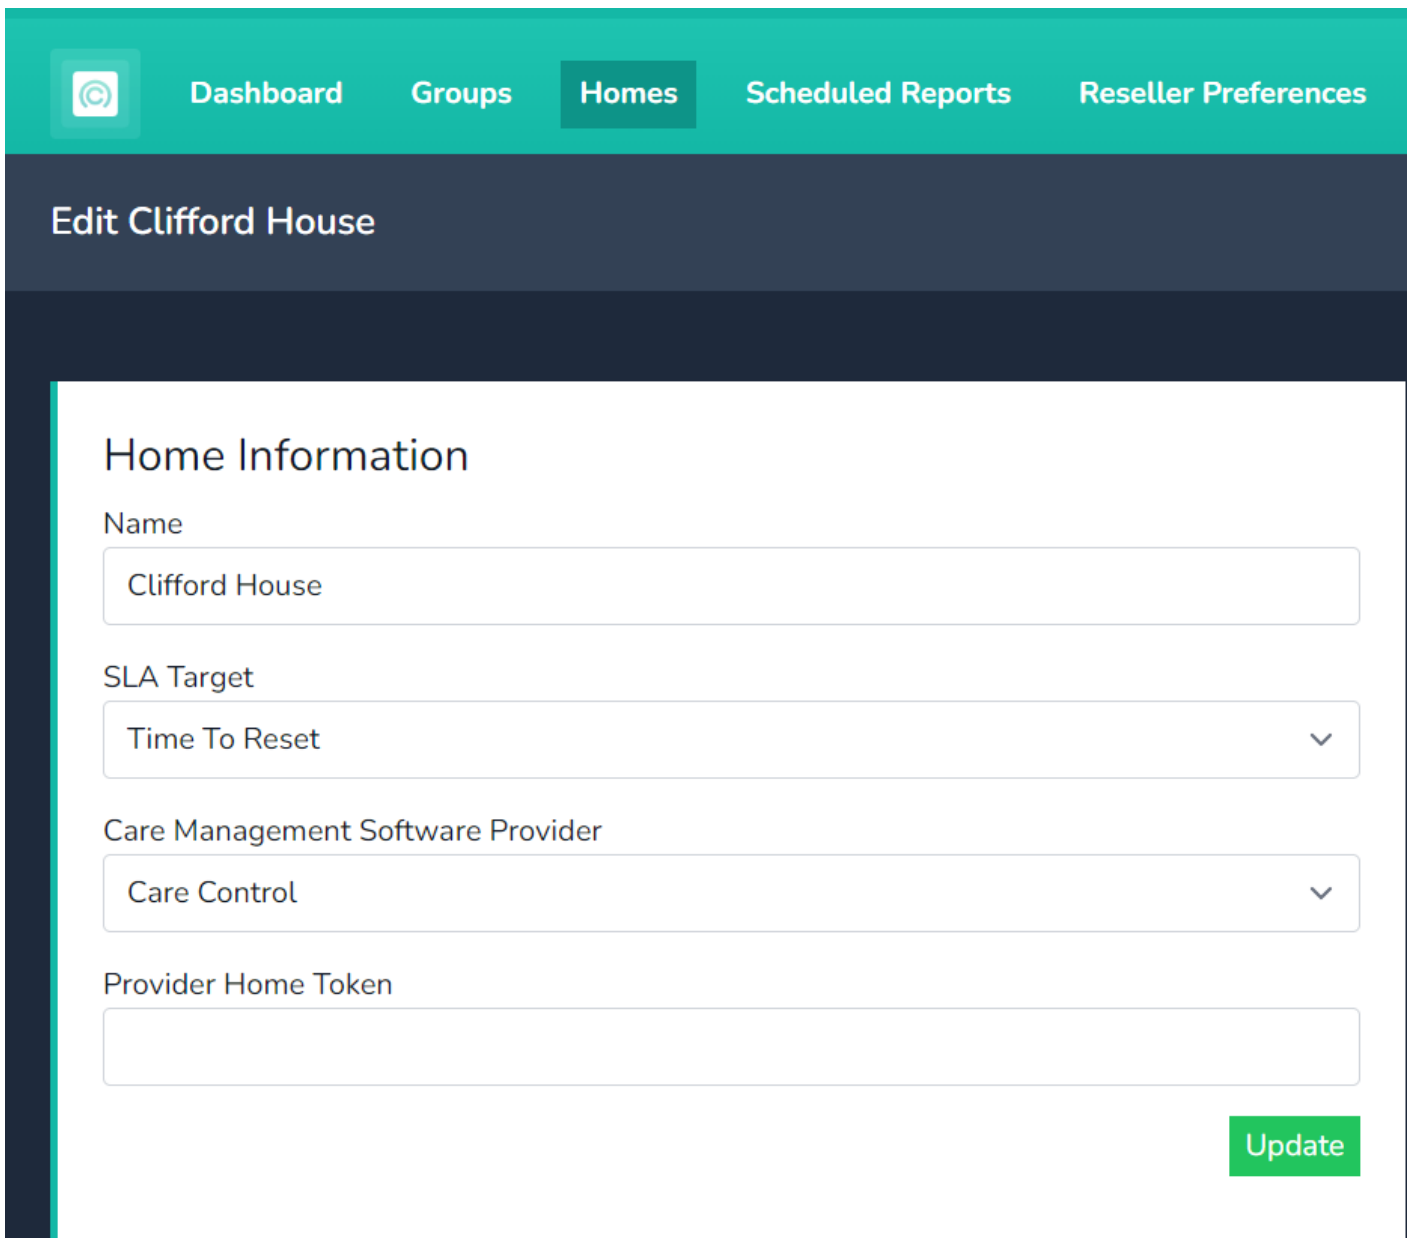

Care Control will provide a hostname, home token & room token.

Hostname - Provide to GHM Technical team, this is inserted in the back-end system.

Home Token - Can be inserted by Customer Admin under Home > Manage > Home Token - This authenticates the two platforms to communicate.

Room Token - Can be inserted by Customer Admin under Home > Manage > Room Token - This allows the Nursecall Callpoint Name to match with the Resident Name in Care Controls system.

Insert Home Token
